

SC20

FIRE DAMAGE REMEDIATION

Low-alkaline detergent

SC20 is a low alkaline agent for removing soot, oil, grease and other types of ingrained dirt. The product is especially suitable for post-fire cleaning.

SC20 product information

- **Low-alkaline cleaner for fire damage remediation**
- **Effectively dissolves and removes soot, oil, grease and other dirt**
- **Based on VOC-free ingredients**
- **Particularly effective for cleaning hard surfaces such as metal and plastic, ceramics and most painted surfaces**
- **Can be used for cleaning delicate surfaces such as upholstered furniture, carpets and clothing.**

Application area

SC20 is a low-alkaline cleaner for thorough cleaning and removal of soot, oil, grease and other types of ingrained dirt after fire. The product can be used for cleaning items with delicate surfaces damaged by fire, such as upholstered furniture, carpets and clothing. Can be used by both professionals and consumers.

Technical information

Product description	Before and after use
<p>SC20 is a low-alkaline cleaner for thorough cleaning and removal of soot, oil, grease and other types of ingrained dirt after fire. The product can be used for cleaning items with delicate surfaces damaged by fire, such as upholstered furniture, carpets and clothing.</p> <p>Can be used by both professionals and consumers.</p> <p>The product is a concentrate that must be diluted according to the use situation.</p>	

How to use	Occupational health and safety
<p>SC20 can be applied by spray, brush, sponge or cloth. Leave the product on for about 5 minutes, then work the surface thoroughly and rinse with water. The optimal water temperature is 20-50°C, but the product can also be used in cold water.</p> <p>The product can be applied with a pressure washer or foam application equipment. Apply a thick layer to the surfaces, starting from the bottom and working upwards. Leave the solution to work for about 15 min. and rinse with water.</p> <p>It may be necessary to treat heavily soiled areas with a brush or scouring pad.</p>	<p>As any contact with cleaning products in general poses a risk of skin dehydration and irritation or permanent damage to the eyes, always work with the necessary protective equipment, including gloves and face shields/goggles.</p> <p>See the safety data sheet for detailed information. The product does not contain any volatile substances, including perfumes and fragrances. Based on the ingredients used, the product is assessed to be indoor air neutral.</p>
